SUMMARY

Aspiring Software Developer with strong fundamentals in programming, problem-solving and basic data structures. Passionate about learning modern web technologies and building user-friendly applications. Eager to contribute to building scalable and reliable software solutions in a collaborative environment.

SKILLS

Programming Languages	Python, Java
Frontend	HTML, CSS, JavaScript
Database	MySQL
Tools	VSCode Git, GitHub
Soft Skills	Problem Solving, Logical Thinking, Teamwork

EDUCATION

B.E in Computer Science , KLE Institute Of Technology, Hubli CGPA: 9.23/10	2023 - 2027
Pre - University (12th) , Karnataka State Board Percentage: 90.66%	2022 - 2023
SSLC (10th) , Karnataka State Board Percentage: 94.56%	2020 – 2021

PROJECTS

Smart Grain - Protein estimation in wheat samples Building a machine learning model to estimate protein content in wheat samples, improving efficiency over traditional testing methods. Applying data preprocessing, feature engineering, and regression techniques for accurate predictions. Tech Stack: HTML, CSS, JavaScript, Node.js	Feb 2026 - Present
Wine Quality Prediction System Building a machine learning model to predict wine quality using chemical features, with data preprocessing, model evaluation, and an interactive UI. Tech Stack: Python, Streamlit.	Feb 2026
Live Weather Desktop Notification Built a Python-based desktop application to fetch real-time weather data and send automated notifications using APIs. Tech Stack: Python, OpenWeatherMap API	Nov - 2025

CERTIFICATIONS/ COURSES

Data Structures and Algorithms - Infosys Springboard Certificate	Nov 2024
Coding and Programming - Samsung Innovation Campus, Hubli	Mar 2024 - Jun 2024
Fundamentals Of Object Oriented Programming - NPTEL	Jan 2026 - Apr 2026

LANGUAGES

English, Kannada, Hindi
